# GEAR UP FOR THE THRILL

STITCHED WITH TECH THAT  
TAKES ALL THE KNOCKS AND  
BOUNCES BACK FOR MORE.

# RIDING APPAREL

Our new bicycle gear is tough. Made to take a beating and bounce back. Yet through consistent innovation in fabric construction, better science and smart application of biometric design, Leatt's new range is lighter and more comfortable than ever. Enhanced protection. New levels of ventilation. More durability. Better tactility. Cherry on top? It looks kickass too.

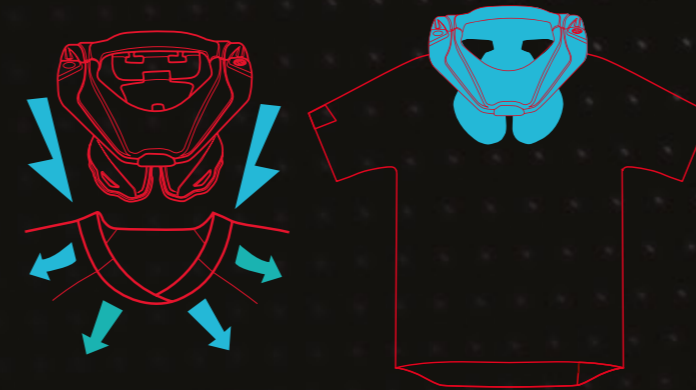

.....

"WE LOVE THIS DBX 5.0 CLOTHING SYSTEM BECAUSE IT LOOKS GREAT AND IT'S BUILT LIKE A TECHNICAL JACKET WITH ITS MATERIALS AND ATTENTION TO DETAIL. PLUS, IT'S MADE TO FIT AND INTERFACE WITH OTHER ESSENTIALS LIKE GLOVES, KNEE PADS, A JACKET AND NECK BRACE."

- MOUNTAIN BIKE REVIEW

## LEATT NECK BRACE COMPATIBLE

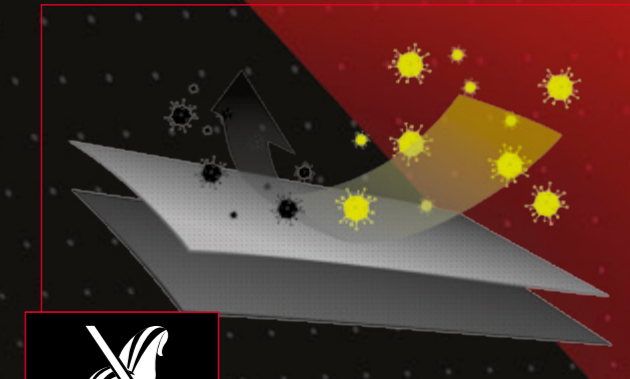

## VENTILATED MESH

Lightweight, maximum airflow, moisture wicking and quick drying.

## ANTIMICROBIAL FABRIC

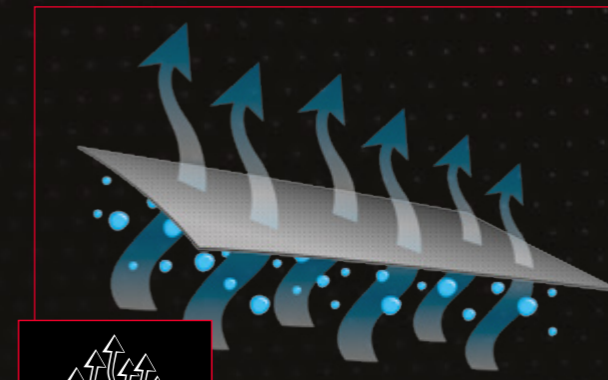

This fabric contains an antimicrobial agent that inhibits the ability of microorganisms to grow on the surface, thereby reducing odor (uses zinc pyrithion).

## WINDPROOF FABRIC

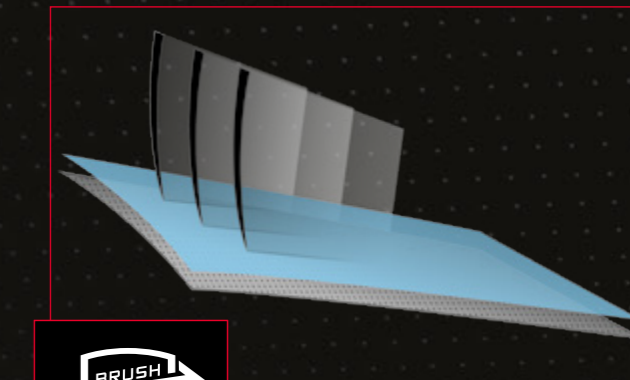

Windblock fabric utilizes a windproof layer with maximum breathability and comfort. The fabric protects your body from the chilling effects of nature while still allowing moisture to escape, preventing you from overheating and perspiration build-up.

## MOISTUREWICKING

MoistureCool wicking fabric is a hi-tech fabric that provides moisture control for your skin. MoistureCool moves perspiration away from your body to the fabric's outer surface where it can evaporate.

## ABRASION RESISTANT

Brush Guard is an ultra-thin and four-way flex film that permanently bonds to a material base. It is feather-light and increases scratch and abrasion resistance properties of base material. All Brush Guards are mapped to critical areas of reinforcement.

# THE THRILL UNLEASHED

'BARELY THERE'  
PROTECTION THAT  
SHRUGS OFF THE  
BUMPS AND SCRAPES

# GLOVES

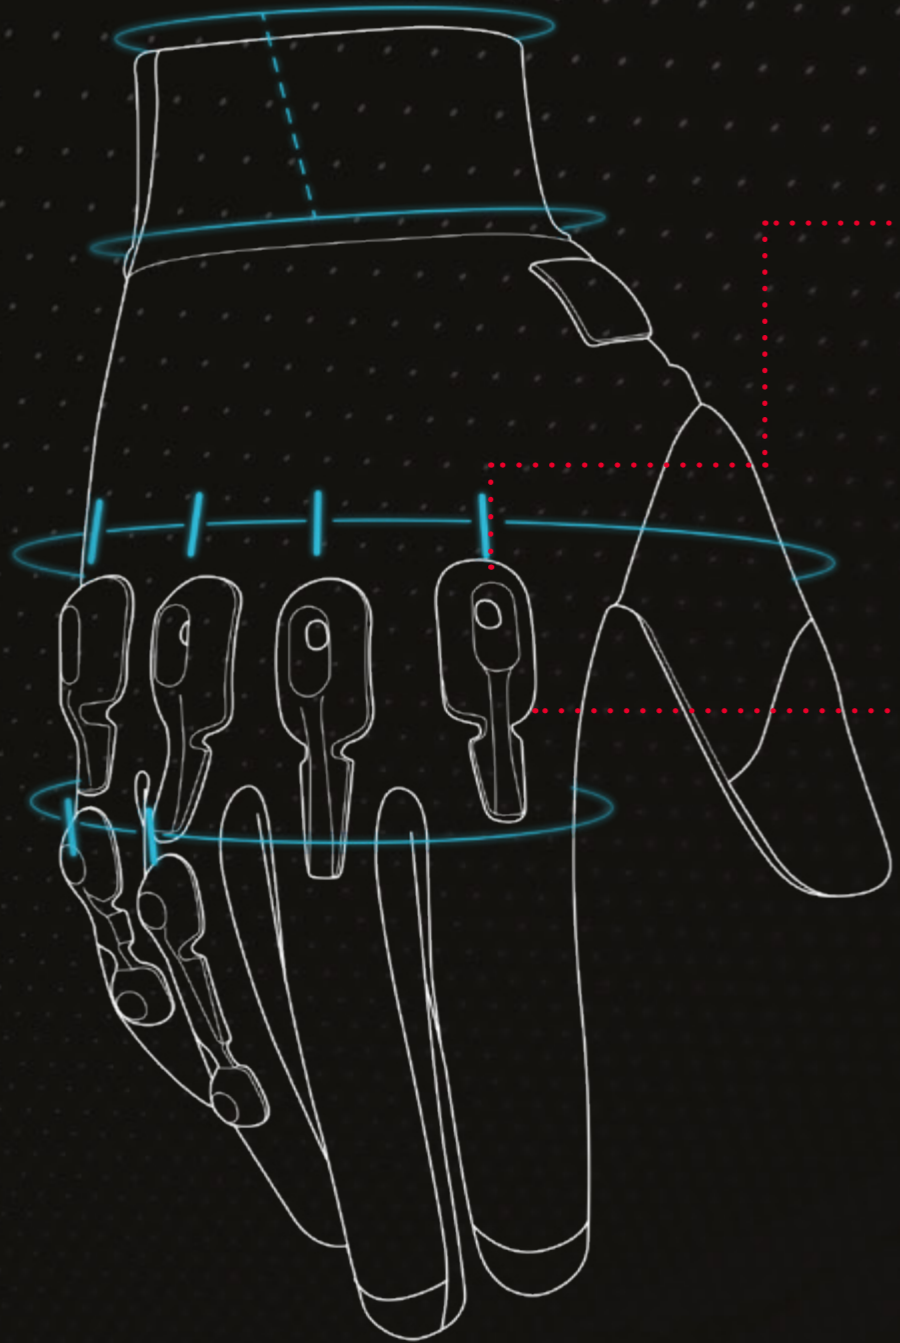

Tactile, sensorial, reactive. If you're looking to get to grips with the Thrill, these are the gloves to pull on.

Affording optimum protection against abrasion and snagging, our bicycle gloves provide awesome grip and 'second skin' protection without compromising on 'feel' between rider and bike.

## 3 LEVELS OF

## PROTECTION

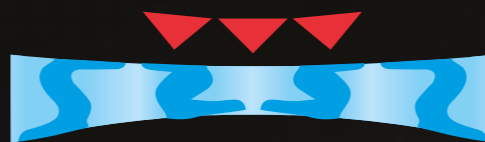

ARMOURGEL® IMPACT  
PROTECTOR CONFORMS TO  
CE EN 13594:2015 LEVEL 1

Armourgel® is a low profile, energy absorbing solution that stiffens upon impact to provide protection. Armourgel® flexes around the body's form in its natural state but stiffens upon impact to offer world-class impact protection.

NATURAL STATE

WHEN IMPACT IS INTRODUCED

"IT'S THE CLOSEST YOU CAN GET TO NOT WEARING GLOVES . . . LEATT'S NANOGRIP MATERIAL MAKES FOR A PALM THAT FEELS THINNER AND MORE SUPPLE THAN ANY WE'VE TESTED."

- BIKE MAGAZINE

We also made use of the totally unique NanoGrip palm material, known for its durability, breathability and superior wet and dry grip properties. It simply cannot be compared to anything else out there.

Each fiber of the NanoGrip is 7,500 times thinner than a human hair, making it super comfy and touch screen compatible. All of this paired with a four-way stretch, breathable upper-hand material, you can see why it is a big deal.

A new addition to the line is a MicronGrip palm.

## 3 TYPES OF MATERIAL

WINDBLOCK	LITE	X-FLOW
<ul style="list-style-type: none"> <li>• Windproof</li> <li>• Water resistant</li> <li>• Four-way stretch</li> </ul>	<ul style="list-style-type: none"> <li>• Light material</li> <li>• Good airflow</li> <li>• Four-way stretch</li> </ul>	<ul style="list-style-type: none"> <li>• Mesh material</li> <li>• Maximum airflow</li> <li>• Four-way stretch</li> </ul>

## 3 LEVELS OF PALMS

### NANOGRIP REINFORCED

- Nano fiber technology
- Fibers 7.500 times thinner than hair
- Very stretchy and flexible
- Ultra-thin for maximum bike feel
- Premium dry and wet grip
- Reinforced lower palm
- Touch screen optimized fingers

### NANOGRIP

- Nano fiber technology
- Fibers 7.500 times thinner than hair
- Very stretchy and flexible
- Ultra-thin for maximum bike feel
- Premium dry and wet grip
- Touch screen optimized fingers

### MICRONGRIP

- Super slim with superior handlebar feel
- Excellent dry and wet grip
- Very durable with touch screen function
- Ultra-thin for maximum bike feel
- Silicone grip print

# NOW WITH ADDED THRILL

HELMETS CRASH TEST  
DUMMIES DREAM OF

# 360° TURBINE TECHNOLOGY

**TURBINES DEFORM TO ABSORB  
VERTICAL AND ROTATIONAL  
IMPACT FORCES**

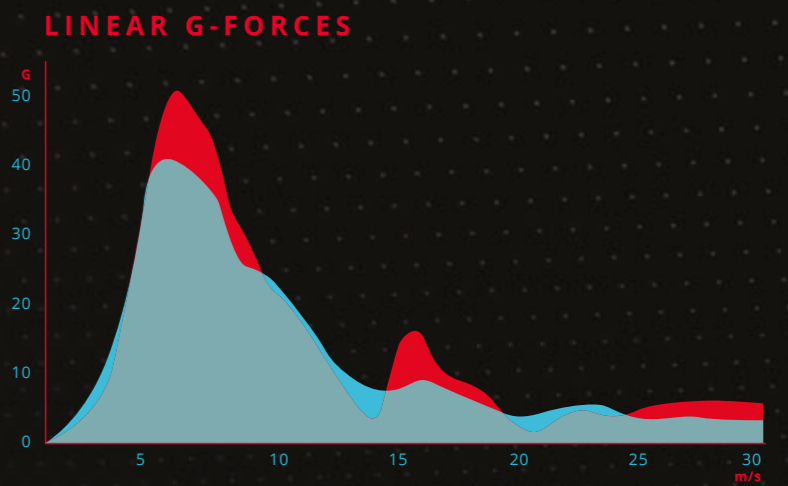

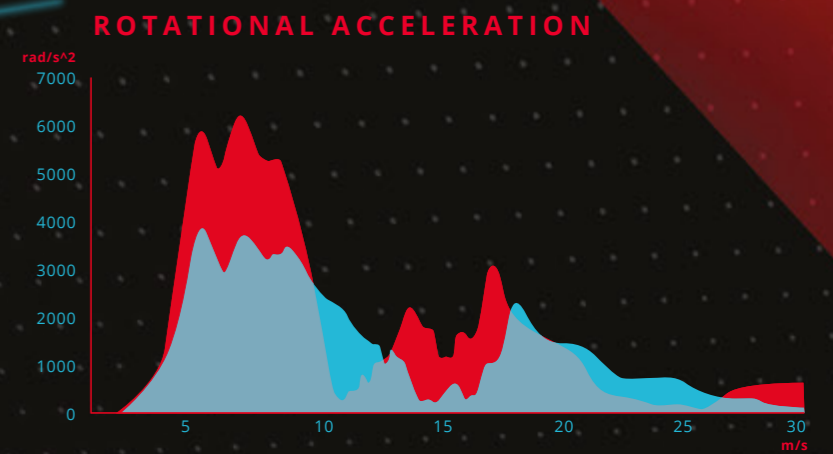

So much science goes into Leatt helmets, you'd expect it to come with a degree!

For starters, there's Leatt's category-defining 360° Turbine Technology. Molded from Armourgel® – an energy absorbing material that instantly hardens on impact – the disc-shaped implants, strategically positioned inside the helmet, dissipate rotational, direct and deflective impact energy, resulting in radically reduced head and brain injury.

It's the wisest safety choice the no-holds barred Thrill seeker could make.

**REDUCES ROTATIONAL ACCELERATION  
AND LINEAR G-FORCES AT LOW SPEED  
WHICH LOWERS THE RISK OF  
CONCUSSION SIGNIFICANTLY**

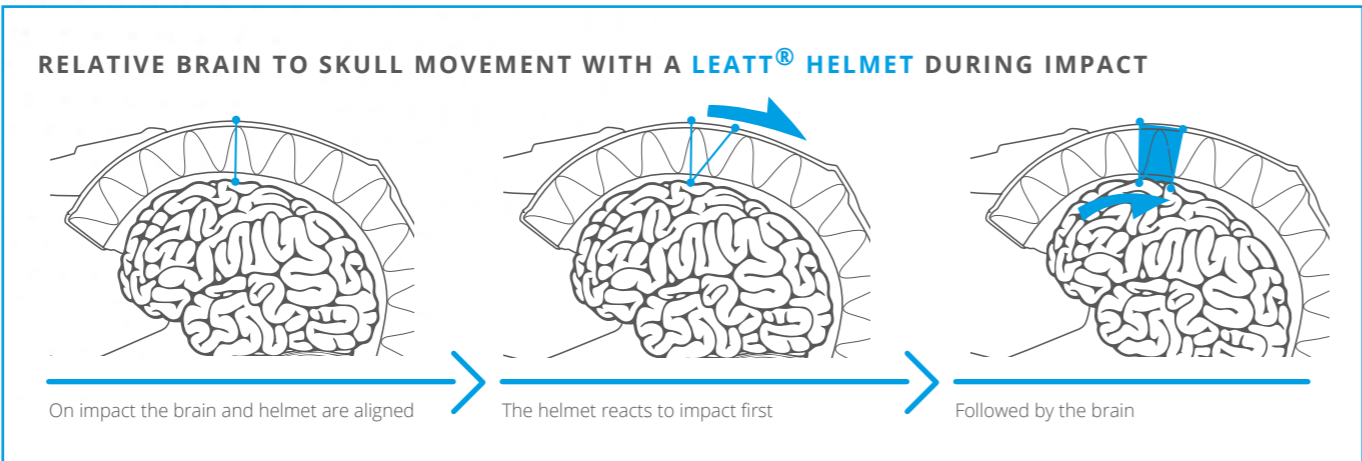

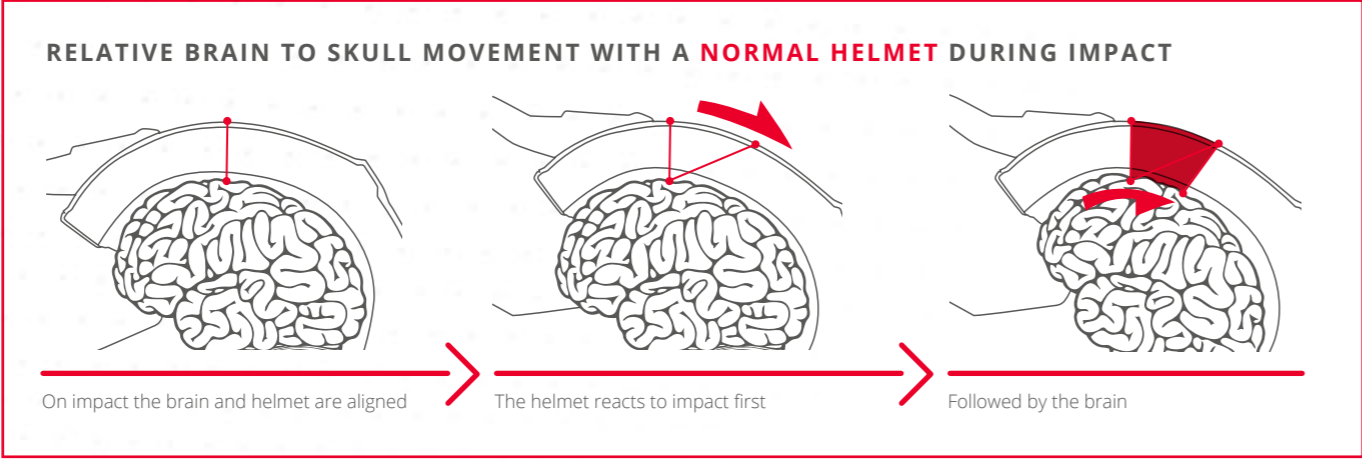

**TURBINE**      **NO TURBINE**

- Reduces up to 30% of head impact at concussion level
- Reduces up to 40% of rotational acceleration to the head and brain

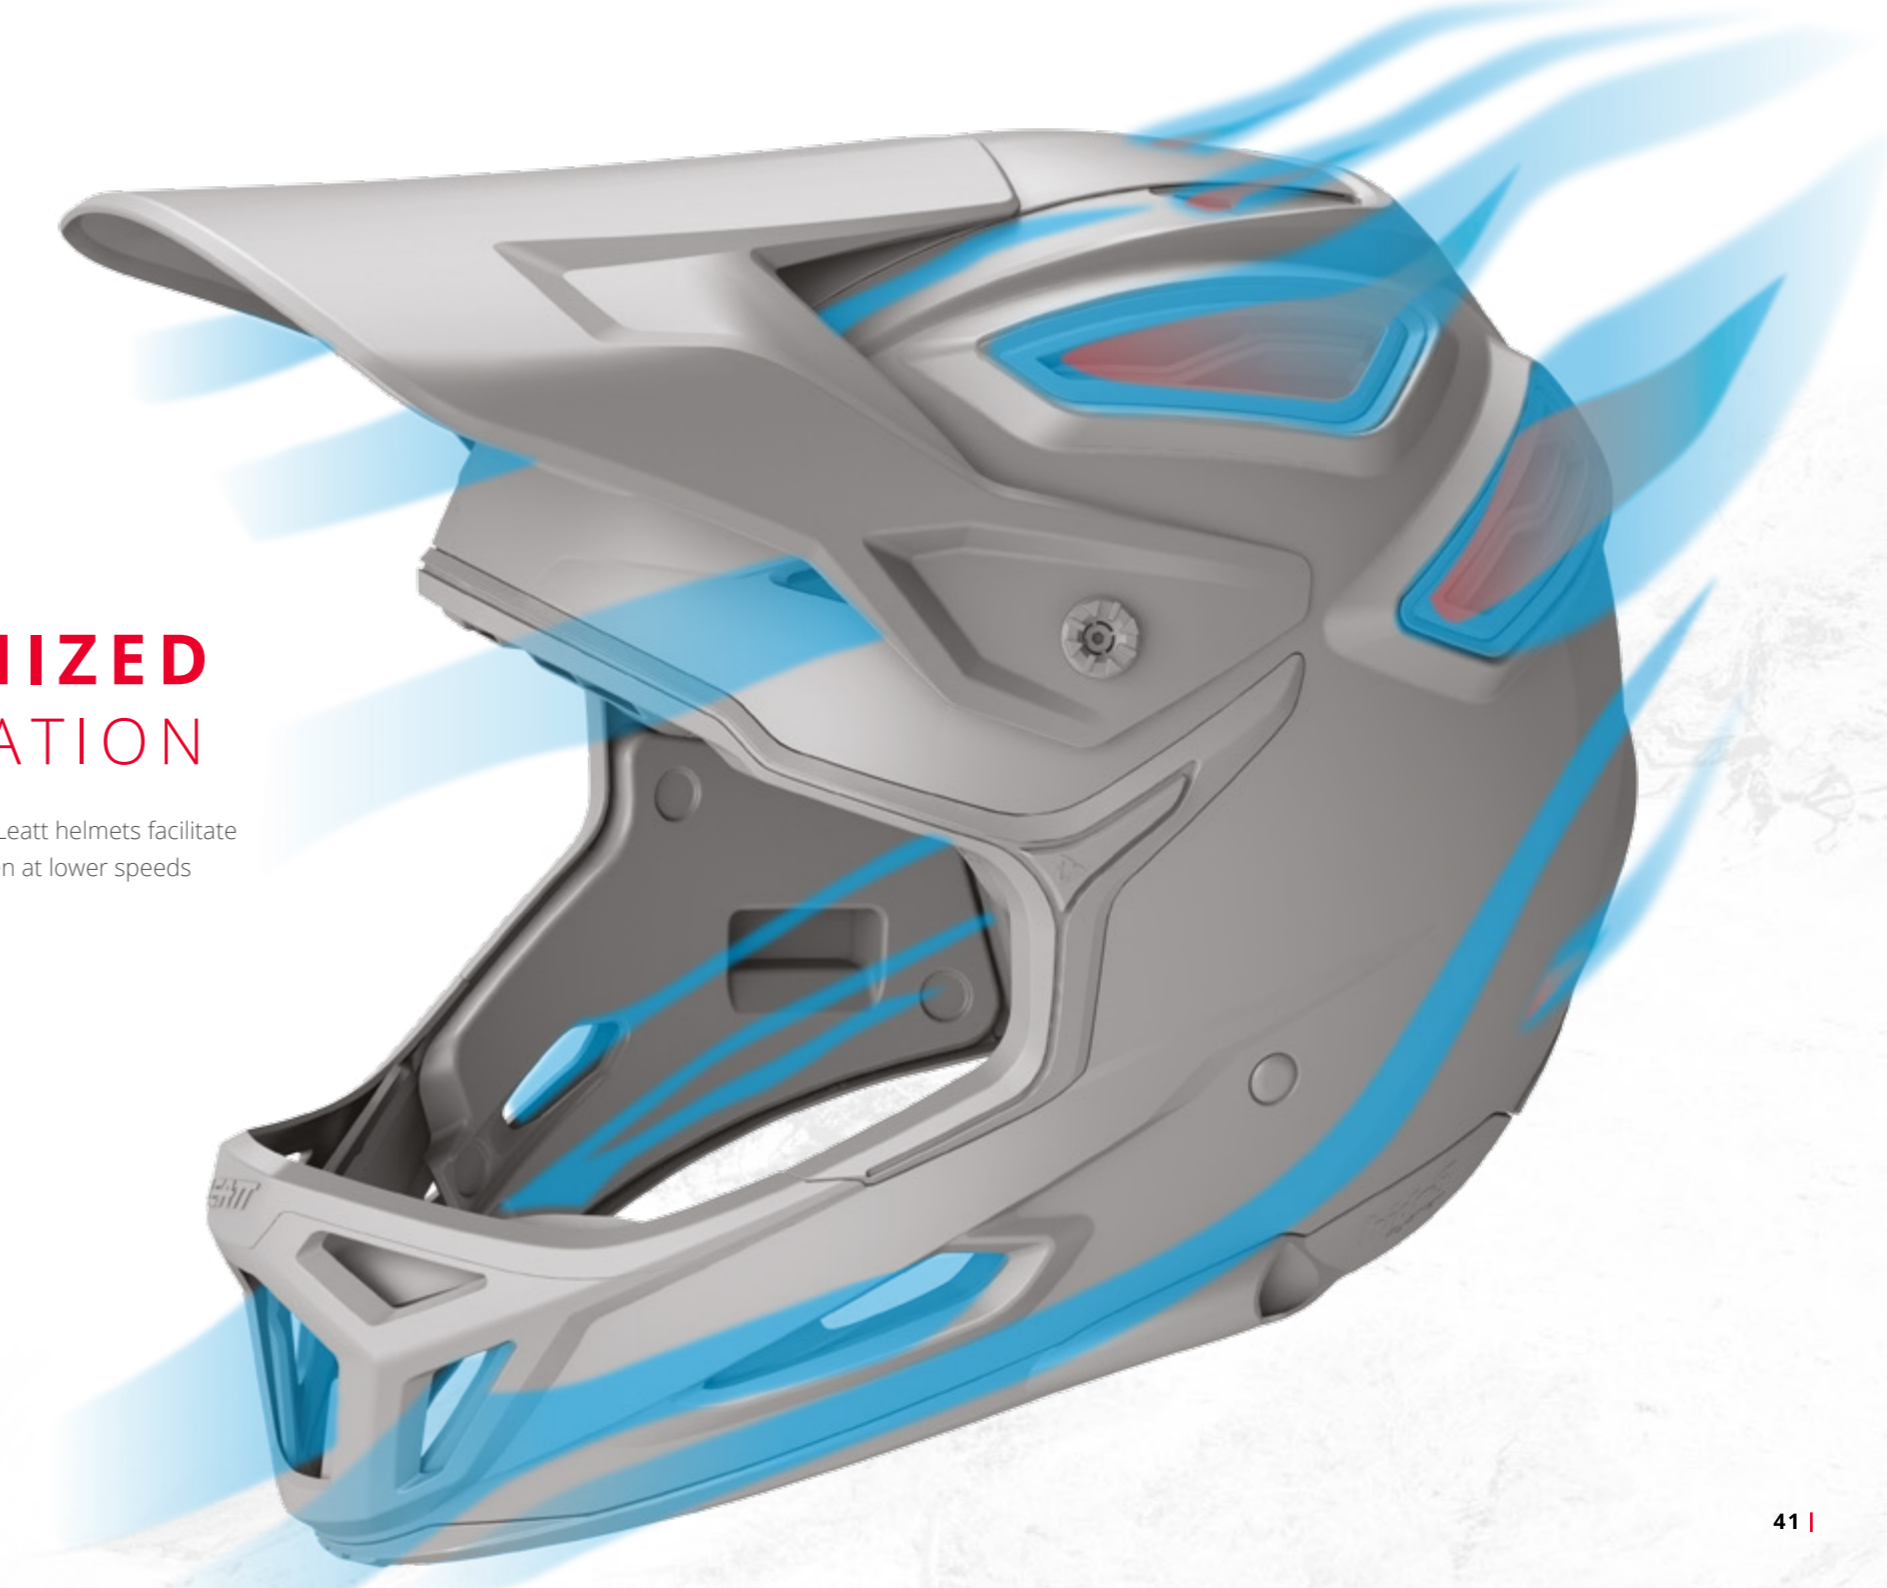

## REDUCED OUTER SHELL VOLUME

OUR OUTER SHELL IS 10% SMALLER, TRANSFERRING UP TO 20% LESS ROTATIONAL FORCES TO THE NECK, HEAD AND BRAIN

## MAXIMIZED VENTILATION

Regardless of the speed, Leatt helmets facilitate all-round ventilation – even at lower speeds

**DBX 6.0 CARBON** HELMET

Part #1017110(\*\*\*)- (240) XS 53-54cm | (241) S 55-56cm | (242) M 57-58cm | (243) L 59-60cm | (244) XL 61-62cm | (245) XXL 63-64cm

USES **FIDLOCK** SNAP HELMET BUCKLE

Carbon shell in three sizes | 360° Turbine Technology: reduces up to 30% of head impact at concussion level and reduces up to 40% of rotational acceleration to head and brain | Reduced Outer Shell Volume: a 10% smaller shell, transfers up to 20% less rotational forces to the neck, head and brain | Multi-density, V-shaped impact foam molded directly to the outer shell significantly reduces G-forces transferred to the head and brain | Fidlock magnetic closure system | New Dri-Lex® moisture wicking, breathable, anti-odor and washable inner liner | Optimal Neck Brace Compatibility | Maximized Ventilation Optimized for Off-Road racing and effective even at very low speeds | Visor with breakaway function for rotational reduction in a crash | Emergency cheek pad removal | Hydration ready (with optional hands-free kit) | Certified and tested to EN1078; US CPSC; ASTM F1952-10 | Lightweight and premium protection | Weight: from 950g (2.09 lbs)

# MAX YOUR THRILL

MAXIMIZE YOUR POTENTIAL  
AND MINIMIZE THE RISK.  
WHO SAID SCIENCE HAS  
TO BE BORING?

# THE LEATT NECK BRACE

The neck brace is where it all started for Leatt. Years later, we are still redefining neck protection with new lab-tested tech innovations.

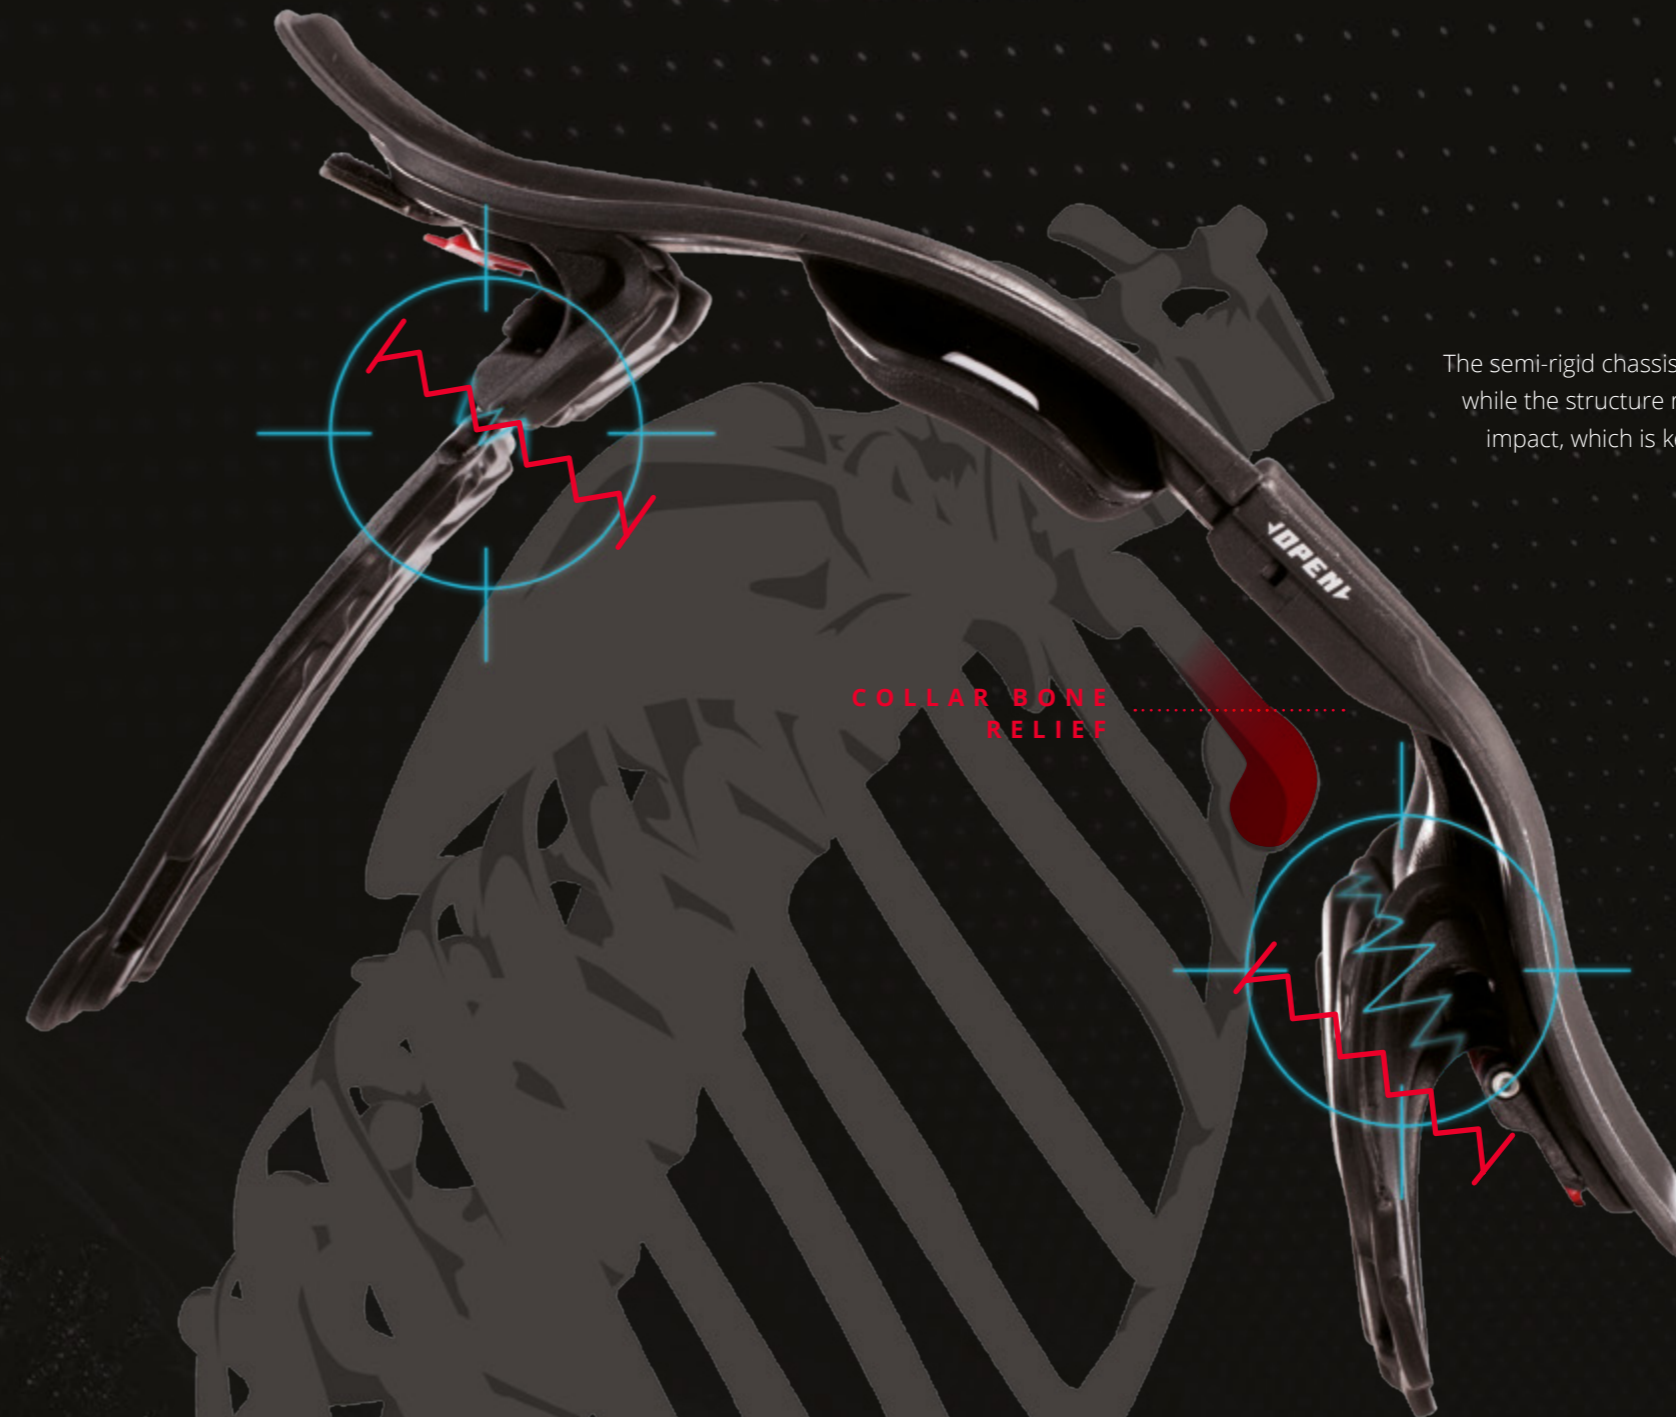

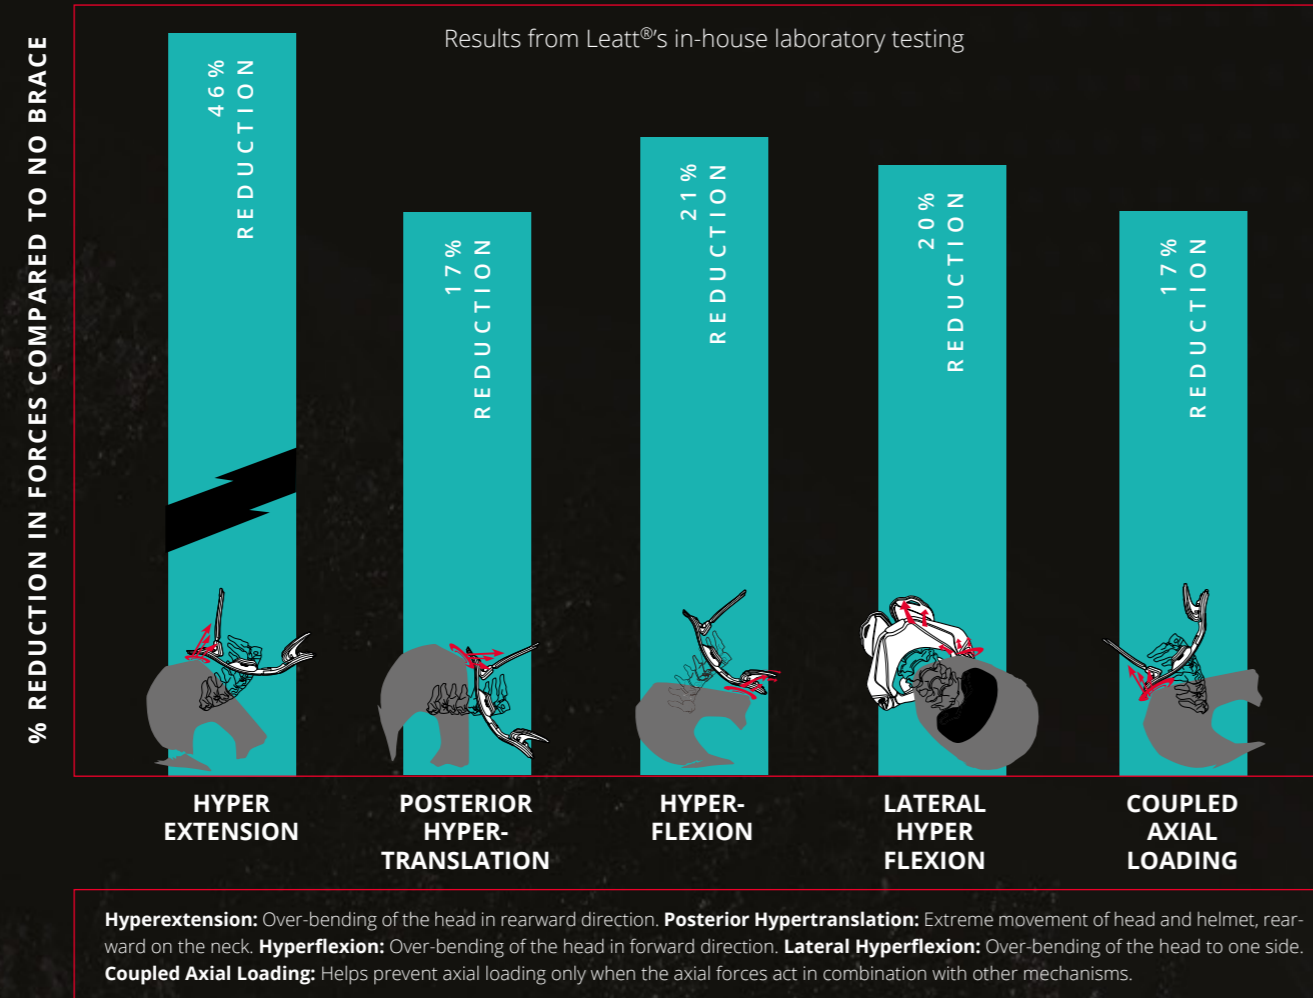

From the ultra-light carbon DBX 6.0 for pro racing, to our brand new entry-level DBX 3.5 offering premium protection at an affordable price, we have a neck brace for every type of rider.

What makes our neck brace so legendary is the function of directing the crash forces from your helmet to your body and bypassing your neck, which is called Alternative Load Path Technology - ALPT®.

We also believe that no other neck brace can be adjusted to fit riders as well as a Leatt-Brace® can.

“LEATT WAS THE FIRST BRAND I EVER TRIED WHEN I DECIDED TO START WEARING A NECK BRACE. THEY AREN'T AFRAID TO BE CREATIVE AND DO THINGS A LITTLE DIFFERENT, BUT STILL STAY AHEAD OF THE CURVE WHEN IT COMES TO TECHNOLOGY AND PERFORMANCE. AS FAR AS I'M CONCERNED, LEATT IS THE ONLY BRAND I WILL EVER NEED TO TRY.” - TYLER MCCAUL

## BRACE VS NO BRACE

The semi-rigid chassis is adjustable enough to fit most riders' body shape while the structure remains very rigid to help transmit energy during an impact, which is key for reducing neck forces.

DESIGNED  
TO BREAK

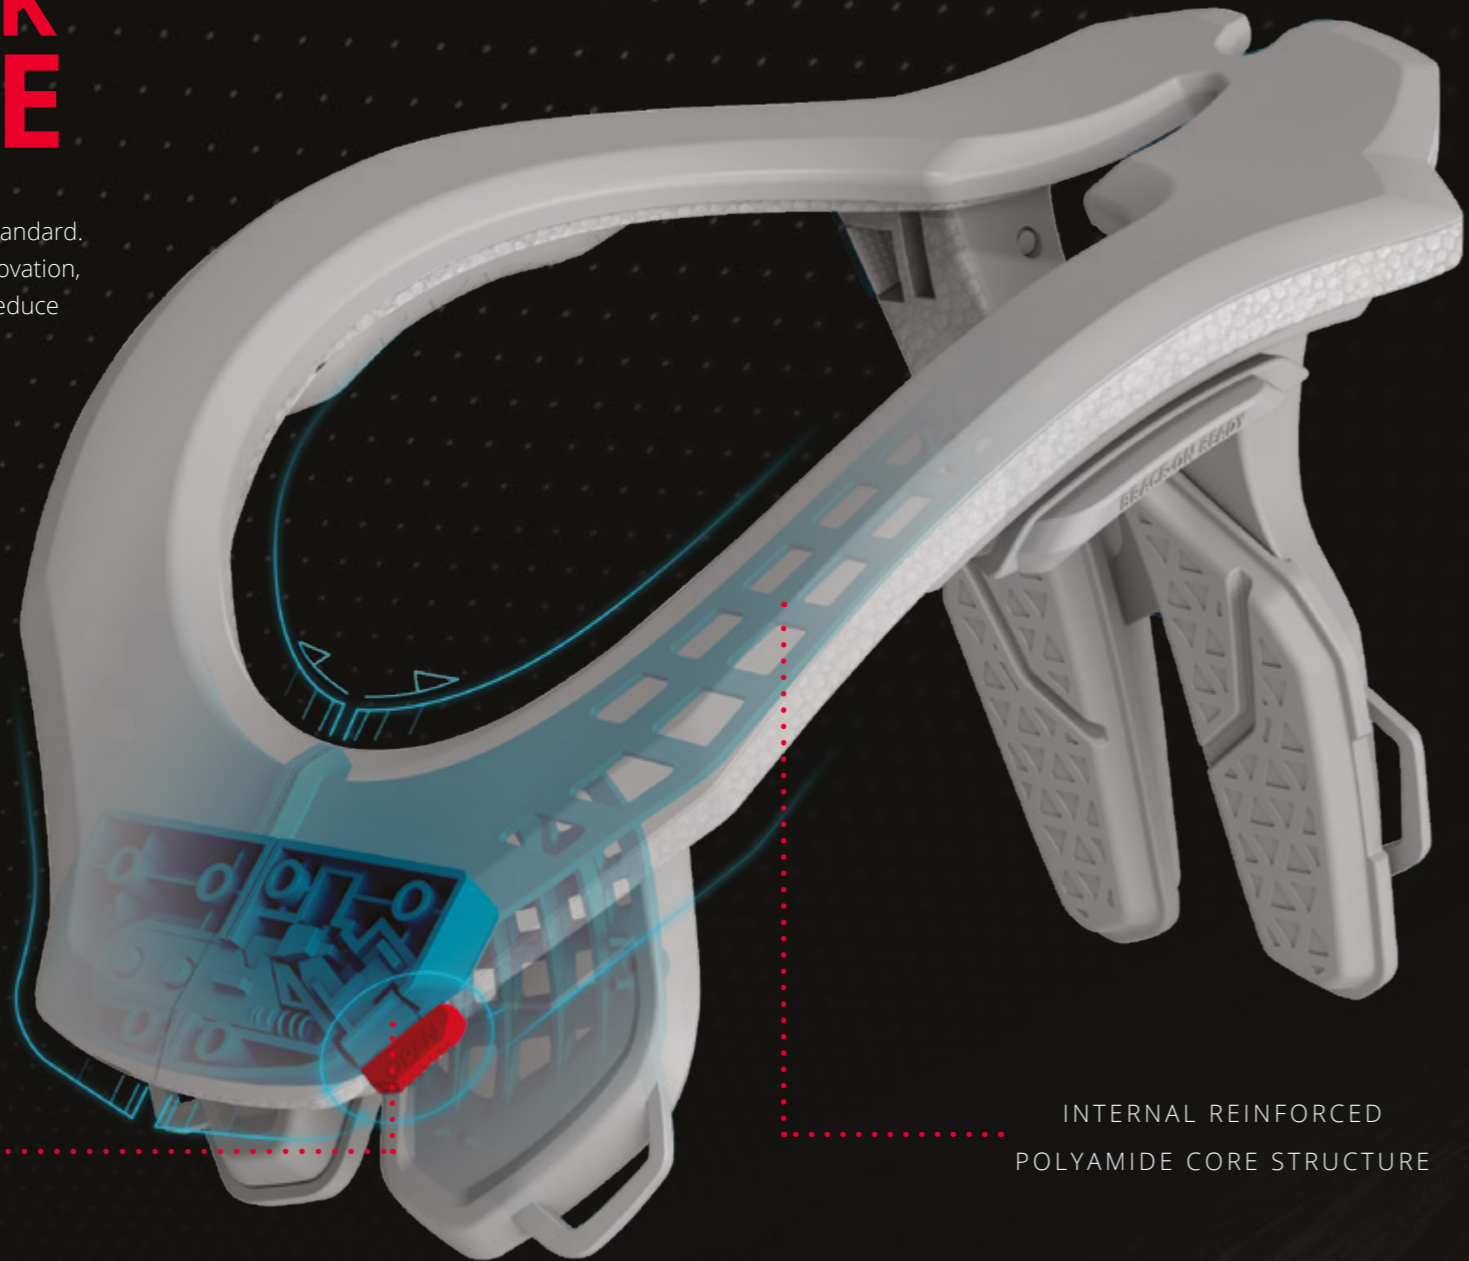

SO YOU  
DON'T

# 3.5 NECK BRACE

Leatt takes vital injury avoidance to a new standard. Light, robust and packed with Leatt Lab® innovation, the new 3.5 Neck Brace is bio-designed to reduce risk of serious neck injury by up to 43%.

A semi-rigid, adjustable chassis absorbs impact and reduces shock force significantly. The neck brace also features a collarbone cutout feature designed to protect fragile bones. Constructed from super lightweight material to maximize rider comfort, the 3.5 Neck Brace is CE certified – giving you extra edge when you need to take that unexpected leap of faith.

# PREPARE FOR THE THRILL

MEET THE THRILL  
HEAD ON

6.0

# KNEE GUARD

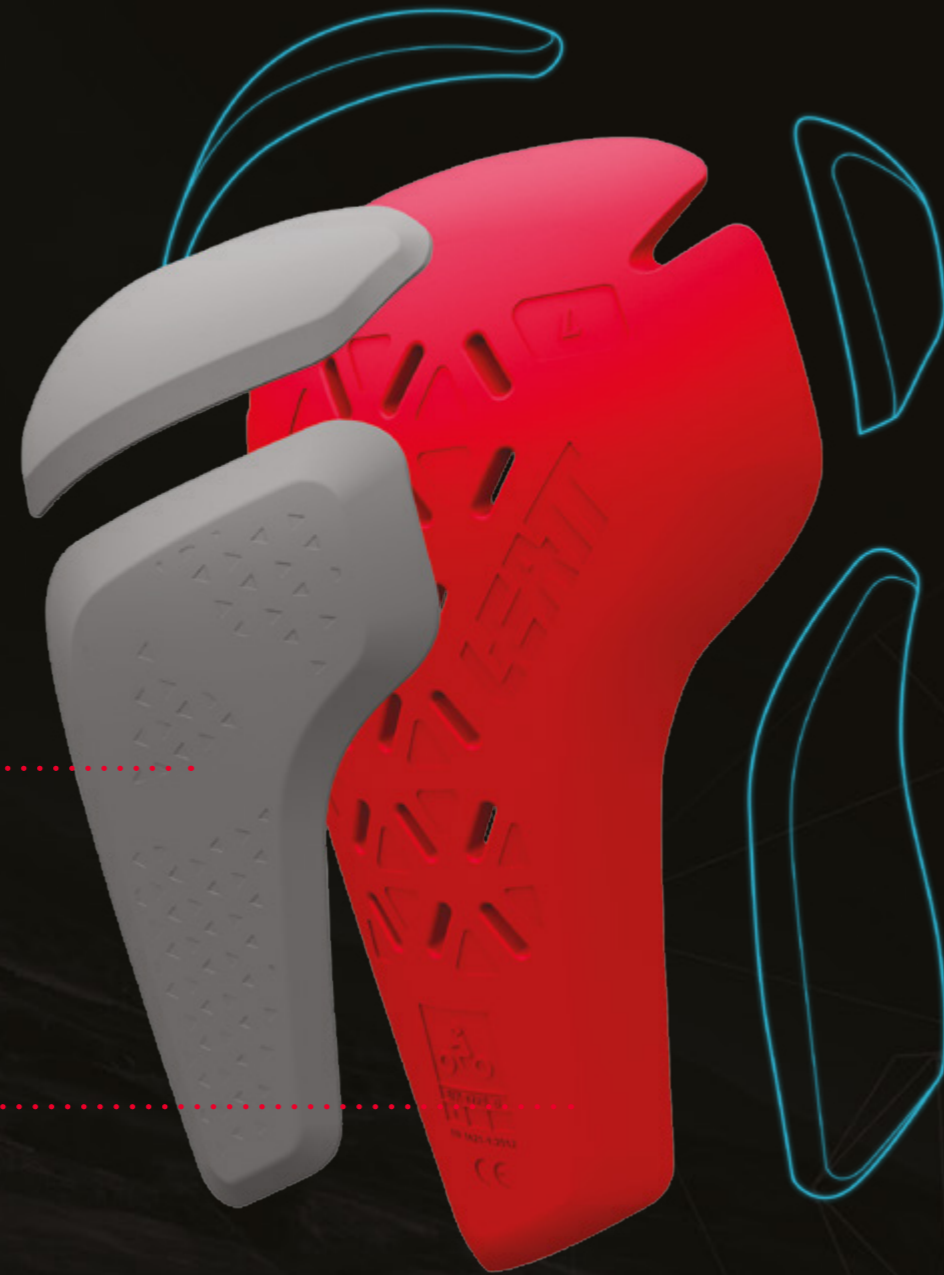

The 6.0 Knee Guard is purpose-designed to give you the best of two worlds. It's a soft guard, pre-curved for a natural, molded fit that ticks the comfort box, whilst both sides of the device are fitted with 3DF AirFit impact foam that hardens on impact for superior protection. The additional co-molded hard shell sliders maximize joint protection.

Flexible and soft, a new anti-slip kneecap and silicone-lined calf band ensure a secure fit while super perforated and vented Neoprene keeps you cool.

CE tested and officially certified as impact protection, the new 3DF 6.0 Knee Guard scores an impressive 20 points on the Leatt Protection Rating System.

# SOFT PROTECTION

Our top-of-the-line soft body protection range offers a super lightweight, ventilated and secure strapping system. The perforated, multi-layer, 3DF AirFit impact foam offers a soft and flexible fit, yet instantly transforms into a harder, energy-absorbing protector upon impact. This combination results in a comfortable fit that conforms to many body shapes and is CE certified to the highest levels on chest and back impact protection!

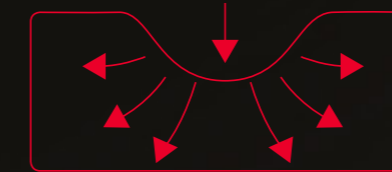

3DF VENTILATED MOLDED FOAM

NEW 3D MESH PANELS PROVIDING EXCELLENT VENTILATION

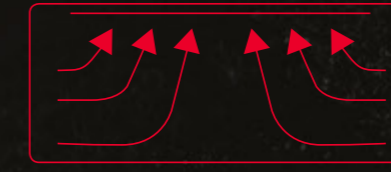

"I CHOOSE LEATT BECAUSE IN ENDURO RACING, CRASHING IS INEVITABLE, BUT BEING PROTECTED IS WHAT ALLOWS ME TO KEEP GETTING UP AGAIN."  
 - TEAL STETSON-LEE, ENDURO ATHLETE.

## SOFT & SAFE

FORCE INTRODUCTION

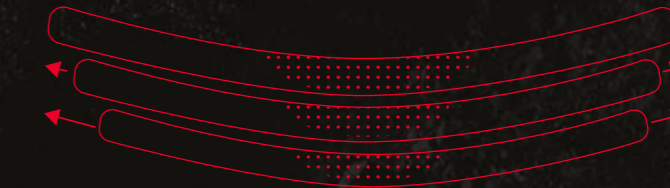

FOAM REACTION

3DF AirFit impact foam offers a soft and flexible fit, yet instantly transforms into a harder, energy-absorbing protector upon impact. This protector conforms to many body shapes and is CE certified to the highest levels on chest and back impact protection.

## MULTI LAYERED TECHNOLOGY

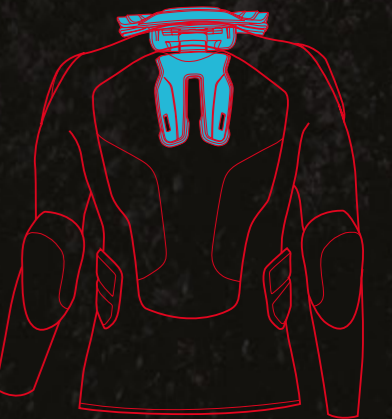

The original 3DF foam uses a solid single layer structure that results in good impact absorption, but limits the amount of bending in the garment.

The multilayer 3DF Airfit foam uses a sandwich type lay up which allows relative movement between layers and therefore results in easier bending and better comfort for the rider while maintaining the same level of impact absorption.

“LEATT PROTECTION HAS BEEN A KEY FACTOR IN ALLOWING ME TO PUSH MY LIMITS AND MAKE THE SWITCH TO RACING GRAVITY. THEIR GEAR IS SAFE AND SECURE WHILE ALSO BEING COMFORTABLE ENOUGH TO WEAR ALL DAY OUT ON THE RACE COURSE.” – **LAUREN GREGG, ENDURO ATHLETE.**

## SOFT & SAFE

FORCE INTRODUCTION

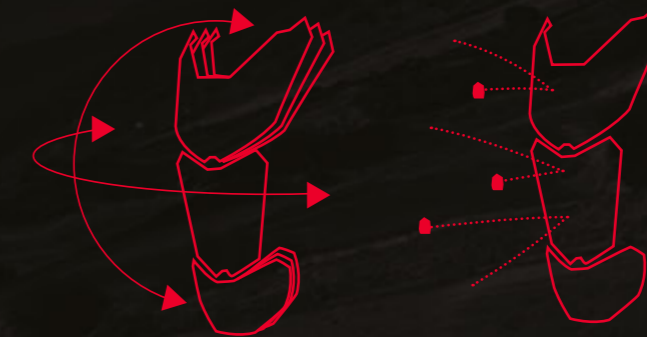

FOAM REACTION

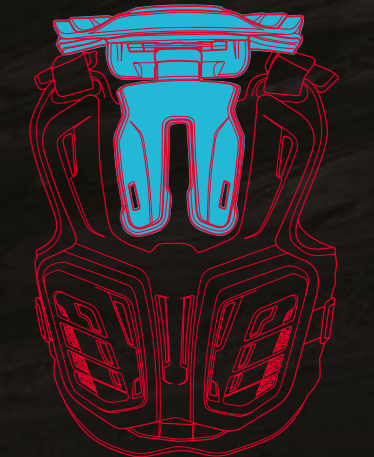

3DF AirFit impact foam offers a soft and flexible fit, yet instantly transforms into a harder, energy-absorbing protector upon impact. This protector conforms to many body shapes and is CE certified to the highest levels on chest and back impact protection.

## HARD & HARDY

Made of high density poly ethylene (HDPE) for high impact or stone deflection, the hardshell range can handle it. Assisted by articulating hard shell panels, the range gets greater natural movement due to the improved rotational axis and better ventilation through smaller individual panels.
